

The **1-10V High Frequency Dimmer Module** works with all 1-10V compatible systems such as interfaces, dimmable high frequency ballasts and fittings as well as LED 1-10V drivers. Push on, push off and rotary dimming control. Can control up to 20mA, eg. 20 ballasts at 1mA (control current of ballast is usually specified at 1-10V terminals).

This module can be used to custom make your own switch/dimmer as the module is manufactured to fit in common available wall plates and back boxes. It can also be used as a direct replacement for faulty or broken modules in existing switch/dimmers.

DPD10VDC MODULE
