

### MK4501

White 220W

Quicklink: Q4135

#### General

|              |         |
|--------------|---------|
| Colour       | White   |
| Construction | Plastic |

#### Electrical

|                 |      |
|-----------------|------|
| Maximum Wattage | 220W |
| Minimum Wattage | 40W  |
| Voltage         | 240V |

Low voltage, 1-gang dimmer switch. Part of the MK Grid Plus System. Modules simply clip into place from the front of the mounting frame.

These dimmers incorporate the latest in microcontroller based circuitry to provide electronic soft-start and overload protection. They are radio frequency interference suppressed to BS EN 55015.

Suitable for use with tungsten filament lamps and for low voltage halogen lamps via good quality, dimmable, electronic or wire-wound transformers.
