

Armoured Cable is waterproof due to the tough PVC black sheathing, making it ideal for outdoor use. It also has a stiff metal ring of metal wires, making the internal wires impenetrable to impacts or incisions if the black sheathing is compromised.

This makes this cable ideal for use in gardens, for example, where wires could be buried under the soil and forgotten about and safety is of paramount importance. This cable will withstand spade, lawnmower or strimmer impacts. This cable is also available in a 2 core version.

This product is priced per metre and cut to order, please order the relevant number of metres required. To buy a 100 metre reel please add 100 to the quantity.

A number of accessories specifically designed for use with this cable are also available.

Please Note: Once cable is cut cannot be returned.
