

GIZA ANOD 2.0M

Anodised Aluminium 2000mm
Quicklink: Q3E38

General

Colour	Aluminium
Construction	Aluminium

Dimensions

Depth	7.5mm
Length	2m
Width	26mm

The **Giza Surface Extrusion Profile** comes in 1m, 2m or 3m lengths and is used to house our LED tape, which keeps the LED Tape safe and out of the way. Architectural extrusion for LED tape – dedicated to be mounted into ceilings and drywall.

- Multiple mounting methods
- Three types of dedicated covers
- Can be connected into linear straight or broken runs
- Ability to create a line of light
- Designed to reach an IP67 waterproof rating

Parts Required

Extrusions

As many lengths of extrusion can be used as is desired. Any 1m or 2m piece can be positioned end to end with each other to make an unlimited distance.

Endcap

An Endcap is required for each circuit of extrusions being used. It is positioned on the end of the very last extrusion in the circuit and is used to stop dust from and moisture from interfering with the electrical components.

Diffuser

A diffuser is used to give the light a more even blend. Simply purchase the same amount of diffusers as you did with extrusions.

The extrusion can accommodate two of the 10mm wide LED Tape.

Can be used in conjunction with the **Teknik Extrusion** ideal for when recessing into plaster board.

This extrusion has been anodized.
