

Ceiling Fan

Havanna Ceiling Fan + Remote Control

Brushed Aluminium with Silver/Graphite Blades 1320mm 100W

MR. RESISTOR®
Lighting Specialist Est. 1968

The **Havanna + Remote Control** is a stylish modern ceiling fan that is perfect for use in the home, office or as a shop fitting. A light source is incorporated within base of the fitting.

This ceiling fan has a brushed aluminium finish. The blades are reversible between silver or graphite colour options for more choice in matching existing interiors (see additional pictures). The 100W halogen linear lamp is encased in a frosted glass bowl to protect from dust. This offers a bright dispersed light to all parts of the room in which it is installed (the lamp is included within the package). A white infra-red remote control is also included for on/off control as well as to operate three fans speeds and a light dimming function. A switch is located on the base of the fan to reverse the spin of the blades, cooling rooms in the Summer and trapping heat in the Winter.

Down Rods should be purchased if this product is to be located in a conservatory or high ceiling room.

A *Ceiling Fan Wall Control Switch* can be hard wired or alternatively a *Radio Frequency Remote Control* can be purchased for wireless operation without having to directly point the remote at the fan. Both methods have four fan speed and on/off settings.

Please see the technical tab for information on selecting the correct fan size, down rods and installation advice. All fan motors carry a ten year guarantee.
