TAPE16 RGB

1.3W 165mm

Quicklink: Q1B4B

General

Construction	Plastic
IP Rating	IP64

LED Chip	SMD 5050
LED per Tape	5
Maximum Connection	10m

Dimensions

Height	3mm
Length	165mm
Width	10mm

Electrical

Maximum Wattage	1.32W
Voltage	24V

Light Characteristics

Beam Angle	120°
Lumens	37 lm
Lumens Per Metre	224 lm/m
Lumens Per Watt	28 lm/W
Watts Per Metre	8 W/m

LED Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or back lighting mirrors to large scale applications such as low level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.

LED Tape 100 RGB carries an IP64 rating making it suitable for bathrooms and kitchens.

Each tape is 165mm and can be connected to another strip via pins. Up to 10 strips can be connected together. The maximum distance between the power supply and LED tape is 20 metres. We recommend using 1.5mm² cable.

This LED tape is dimmable and we recommend using the Triac LED Dimming Driver. Ensure the dimming driver you use exceeds the total wattage of the LED Tape.
