

DPD250W

Black 250W

Quicklink: Q1718

General

Colour	Black
Construction	Plastic
IP Rating	IP00

Load Type	Resistive
Spindle Length	6mm

Dimensions

Depth	21mm
Length	64mm
Width	25mm

Electrical

Maximum Wattage	250W
Minimum Wattage	40W
Voltage	240V

The **Resistive Load 2 Way Dimmer Module** allows you to custom make your own switches as they easily attach to standard manufactured wall plates. They are also used to replace faulty or broken modules in existing switches. If purchased for this purpose, please ensure that you select the correct wattage and check whether it is a an inductive or resistive load.

This particular module is only suitable for resistive loads (for use with electronic transformers), not inductive loads. If used for mains voltage lamps, please follow the minimum and maximum resistive loads given on this products specification.
