Width	86mm

Electrical

Maximum Wattage	1000W
Maximum Wattage per Circuit	500W

The finely crafted **SceneStyle4** is equally suitable for either residential or commercial applications and is fully compliant with all relevant safety standards. **SceneStyle4** is a complete 'one-box' solution that fits into a 47mm UK, double-gang sized, back box.

Its unique circuitry, does not require a neutral connection, thus eliminating the need for mains rewiring and making it an ideal solution to replace existing light switches or traditional dimmers.

SceneStyle4 incorporates state-of-the-art trailing edge technology that dims all types of GLS lamps, GU10 mains halogen, low voltage electronic transformers and other compatible lighting loads without buzzing.

Each **SceneStyle4** is supplied as standard with an eight-button infrared handset that mimics the control panel, so you do not even have to leave the comfort of your favourite chair to enjoy hi-tech control of your lighting.

*Please note that the plate is sold separately and is not included with the **SceneStyle4**.
