

## ZT051H5 SS GU10

Marine 316 Stainless Steel 35W  
Quicklink: Q4370

### General

Cap	GU10
Colour	Stainless Steel
Construction	316 Marine Stainless Steel
Dimmable	Yes
IP Rating	IP65

### Dimensions

Cable Length	3m
Height	445mm
Length	170mm
Width	63mm

### Electrical

Maximum Wattage	35W
Voltage	240V

The **Smooth Glare Hood Spike Light** is an IP65 rated fitting suitable for location in any soft ground. It is ideal for low level lighting of pathways, plants or ponds. It can be tilted so that the beam of light can be precisely controlled.

The head easily screws off for accessing the lamp. The length of the barrel allows this fitting to be used with halogen, compact fluorescent and LED lamps (available separately).

### Lamp Options

- **Halogen** - Most popular lamp for use with this fitting. Produces a standard light source that is available in various beam angles. Can be dimmed.
- **LED** - Used as a direct replacement for halogen lamps. Produces a light source equivalent to a 35W halogen but requires only 5W, making it very energy efficient. Cannot be dimmed.
- **Compact fluorescent (Switching)** - Used as a direct replacement for halogen lamps. Produces a light source equivalent to a 50W halogen but requires only 11W, making it much more energy efficient whilst also being suitable where a higher output is needed (such as for flood lighting). Cannot be dimmed.
- **Compact fluorescent (Dimming)** - Produces a light source equivalent to a 50W halogen but requires only 11W, making it much more energy efficient whilst also being suitable where a higher output is needed (such as for flood lighting). Can also be dimmed, losing no functionality from a standard halogen lamp.
