IP Rating IP00

Blade Finish Antique Pine / White
Larch

Dimensions

Blade Length 1320mm

Electrical

Voltage 240V

The **Tiffany II** is a retro styled ceiling fan that is perfect for use in a home or bar setting. A light source is incorporated within base of the fitting.

This ceiling fan has a brushed nickel finish. The blades are reversible between antique pine or white larch colour options for more choice in matching existing interiors (see additional pictures). Three 60W SES incandescent lamps are encased inside the Tiffany bowl to protect from dust and offers a bright dispersed light to all parts of the room in which it is installed (the lamps must be purchased separately). Simply hard wire to a *Ceiling Fan Wall Control Switch* or alternatively purchase a *Radio Frequency Remote Control* for wireless operation. Both methods have four fan speed and on/off settings. A switch is located on the base of the fan to reverse the spin of the blades, cooling rooms in the Summer and trapping heat in the Winter.

Down Rods should be purchased if this product is to be located in a conservatory or high ceiling room.

Please see the technical tab for information on selecting the correct fan size, down rods and installation advice. All fan motors carry a ten year guarantee.
