

The **Wired PIR Sensor Kit 240V** is a **Wise Transmitter** with a **Wired 360° PIR Surface Mounted Occupancy Switch**. The Wise Transmitter enables the PIR to send wireless signals to any Wise Receiver. Ideal for when you cannot install any cables between your sensor and your lighting circuit.

The transmitter is small enough to be placed in many locations, for example, in the ceiling, in the wall either through it, behind a recessed light fitting or in a surfaced mounted fitting. The transmitter should be placed in a suitable insulated box.

It can be fitted into a small waterproof box to allowed it to be used outside for your garden lighting, garage doors and water features.

The transmitters are designed to be simple to install, easy to use and most importantly, reliable.

Wise Controls Introduction Video

WISE SLW360

2 Channel White

Quicklink: Q36F8

General

Colour	White
Construction	Plastic
IP Rating	IP44

Detection Angle	360°
Detection Range	6m

Dimensions

Depth	53mm
Diameter	103mm

Electrical

Input Voltage	240V
Maximum Wattage	2000W
Output Voltage	240V
