

## New Plaster Lights

### For a Contemporary Seamless Look

[Downlights](#) [Surfaced Downlights](#) [Wall](#) [Low Level](#) [Extrusion](#)

### Plaster Downlights

The **Blanco Plaster Downlights** are designed to be plastered into ceilings to give a seamless appearance. These fittings are constructed from Plaster which means they can be painted once installed.

### Plaster Wall Lights

The **Linear Plaster Wall Lights** are simple understated fittings with no fussy detail. They have a linear contemporary design and are suitable for paint finishes, allowing you to blend the fittings with the overall scheme of the room.

## **Plaster Extrusions**

The Blade Plaster

**Extrusions** are constructed from high strength plaster. They are used for indirect recessed lighting. LED strips or T5 fluorescent tubes can be used with these extrusions.

## **Plaster Low Level Fittings**

The Plaster Low

**Level fittings** are hidden wall recessed spotlights used for indirect lighting. They are ideally used to highlight walkways such as corridors, paths and stairs.

## **Plaster Surfaced Downlights**

The Osca Surface Downlights are surfaced mounted lights. They are ideal for situations where you have a concrete ceiling or cannot cut into the ceiling. They can also be painted to fit in with interior colour schemes.
