

LED45MM 1W AMBER

1W Amber

Quicklink: Q3DC4

The LED BC 1W Colour Change is designed as a direct retrofit replacement for halogen BC lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents but is up to 80% more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.

General

Cap	BC / B22
Construction	Glass / Plastic
Dimmable	No

Dimmable No

Dimensions

Diameter	43mm
Length	65mm

Electrical

Maximum Wattage	1W
Voltage	240V

Light Characteristics

Light Colour	Amber
