The **LED BC 1W Colour Change** is designed as a direct retrofit replacement for halogen BC lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents but is up to 80% more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.

General

Cap	BC / B22
Construction	Glass / Plastic
Dimmable	No

Dimmable	No
