The **ColourStyle DMX 512 Channel** is a feature-rich programmable DMX controller, designed to offer comprehensive and intuitive control of all DMX fittings, including colour mixing LED's. It is ideal for both commercial and residential installations such as restaurants, bars, hotels, modern residential interiors, lightscapes, retail outlets, point-of-sale, illuminated signs and exhibition stands.

ColourStyle is a totally stand alone wall box solution and requires no additional equipment to control your DMX fittings. It utilises fashionable screwless front plates and fits neatly into a 47mm UK twin gang back box.

ColourStyle includes a comprehensive library of DMX luminaires and effects, which enable it to be installed and programmed with ease. The LCD display and scroll wheel allows for more complex sequences, timed events and colours to be added without the use of computers.

Please note that this product does not come with a face plate, this will have to be purchased separately. A power supply unit and plug to mains is included. Access our download section where this products specification sheet, user guide and advanced use guide can be found.
