The **Emergency Twin Spotlight** is a powerful twinspot non-maintained lighting for defined escape routes in interior applications. Ideal for use in warehouses, factories, long corridors and high bay industrial applications. Twin halogen lamps are supplied with this fitting.

### Key Features

- Adjustable heads
- Individual LED lamp health indicators
- Supplied with 2 x 20W halogen 12V B15 lamps & 2 x 12V 7Ah batteries
- Fused mains terminal
- IP rating: IP20
- Conforms to BS EN 60598-1:2004 & A1: 2006 and BS EN 60598-2-22:1999

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

**Maintained Emergency Lighting:** The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

**Non-Maintained Emergency Lighting:** A non maintained fitting is not illuminated until the event of power failure.
