

The **LED Emergency Gear Tray** is a maintained emergency pack.

Emergency packs are used in commercial buildings as a safety precaution during a power outage, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.

GT174K EM/MIC/HL

17W Maintained / Motion Sensor / Dimming
Quicklink: Q46C5

General

Construction	Metal / Plastic
IP Rating	IP20

Battery Life	3 hours
Emergency Type	Maintained

Dimensions

Diameter	263mm
----------	-------

Electrical

Maximum Wattage	17W
Voltage	240V

Light Characteristics

Colour Rendering Index	80
Colour Temperature	4000K Cool White
Lumens	1700 lm
Lumens Per Watt	100 lm/W
