

The **LED Golfball SES/E14 4W** is designed as a direct retrofit replacement for halogen BC lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents but is up to 80% more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.

LEDGOLF4W SES FR

4W 2700K Warm White
Quicklink: Q4CA7

General

Cap SES / E14
Construction Aluminium / Plastic

Dimmable Yes

Dimensions

Diameter 42mm
Length 76mm

Electrical

Energy Efficiency Rating A+
Maximum Wattage 4W
Voltage 240V

Light Characteristics

Colour Rendering Index 80
Colour Temperature 2700K Warm White
Lumens 270 lm
Lumens Per Watt 68 lm/W
