

LED Maxi Neon Flex RGB is a versatile and user-friendly lighting device. It can be cut every 500mm, bent, and formed in the field and is easily installed on the flat surface of varied materials. These include wood, plastic, steel or concrete walls.

24V Neon Flex can be cut shorter than 240V and is also safer for bathroom, shower or swimming pool lighting.

Please Note: This product has a cut length of 500mm but is sold by the metre. The longest run possible for this product is 20 metres.

The main advantages to using **LED Neon Flex Slim** over similar products is that it provides high and even brightness and long life whilst also being durable and energy saving.

Please note : Primary image is illustrative only. The neon flex colour changes to one single colour at a time.

If the tube is cut into sections, we cannot refund.
