General

Cable Colour	White
Colour	White
Construction	Metal / Plastic
IP Rating	IP44

Number of LED's 260

Dimensions

Cable Length	4m
Diameter	320mm

Electrical

Maximum Wattage	25W
Voltage	240V

The branches of the **LED Snowflake 32** house LED lights in either blue, cool white or warm white. They attach to a central frame to form a snowflake shape that when lit produces a stunning festive lighting effect. The snowflake can be used to brighten your indoor Christmas decorations or, as it is IP44 rated, can be safely used to add seasonal cheer to outdoor spaces. An integral 24V driver allows the fitting to be plugged directly into a mains supply for easy and convenient installation. The Snowflake comes with a black or white frame and is available in either 32mm or 65mm diameter sizes. This pendant cannot be used with a dimmer.
