

LED Tape Ultra Waterproof IP68 RGB 14.4W 24V
LED Tape Ultra Waterproof IP68 RGB 5m (60xSMD 5050
LEDs/m) 24V
72W (1m=14.4W) 5000mm

LED Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or back lighting mirrors to large scale applications such as low level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.

This LED tape is our most waterproof at IP68. It is ideal for outdoor use or in bathrooms and can even be submerged in water.

This LED tape is dimmable and we recommend using the Triac LED Dimming Driver. Ensure the dimming driver you use exceeds the total wattage of the LED Tape.

LED tape power cord included and is 200mm long.
