

## LOS-CDT-2000-WH

White 112mm

Quicklink: Q49FF

### General

Colour White  
Construction Plastic

### Dimensions

Depth 35mm  
Diameter 112mm

The **Lutron Ceiling Mount Sensor** is an intelligent, continually adapting sensor that eliminates manual sensitivity and timer adjustments during installation and over the life of the product.

Ultrasonic combined with Passive Infrared, high sensitivity, high noise immunity and excellent false tripping immunity makes this product suited for complex environments that are difficult to control with single-technology sensors.

### Other Features Include

- Snap-locks to ceiling mounted cover plate
- Non-Volatile Memory: setting saved in protected memory are not lost during power outages
- Allows choice of turning lights off or dimming to a preset level in unoccupied state when integrated with a Lutron system
- Range from 450-2,000 ft<sup>2</sup> (132-610 m) (mounted on an 8-12 ft (2.4-3.7 m) ceiling)
- 8-second test mode to easily confirm proper operation
- 20-24 VDC, class 2 (PELV) low-voltage wiring
