Colour	Gold
Construction	Plastic

### Dimensions

Depth	25mm
Length	71mm
Width	45mm

### Electrical

Maximum Wattage	160W
Minimum Wattage	40W
Voltage	240V

The **240V Slide Dimmer** is an in-line slide dimmer which can be used in conjunction with your incandescent or halogen floor/table lamps. Certain dimmable fluorescent and LEDs may be used also, but the 40W minimum load would have to be adhered to.

To install, simply connect the live and neutral from your plug to the input of the dimmer, and the live and neutral from the lamp to the output of the dimmer.

A maximum of 160W can be dimmed from a single 240V slide dimmer.
