Electrical

Maximum Wattage	9W
Voltage	240V

The **Soprano Bollard** guide light produces a low level light source to provide illumination of paths, driveways and walls. A compact fluorescent lamp is used instead of standard incandescent lamps to increase energy efficiency.

Constructed from aluminium and glass and finished in anti corrosive paint. This fitting cannot be dimmed. A 9W GX53 compact fluorescent lamp is available separately. Low level switching and PIR switching versions of this product are also available.
