

### WISEVENT LID

Grey

Quicklink: Q154F

The **Wise Dim Vented Lid** fits onto the Wise Dim and allows it to dim and switch a greater load, currently the WiseDim with the standard lid can run a load up to 700W per circuit but when this lid is fitted it can run up to 925W per circuit (total of 3700W)!

Note - This lid must be installed with the vents pointing downwards to keep the WiseDim IP rated and can only be fitted to the Wise Dim.
