

WISEILIKE2 BLK

2 Channel Black
Quicklink: Q2EA0

General

Colour Black

Operating Temperature -10°C ~ +55°C
Radio Frequency 868.3 MHz

Dimensions

Depth 14mm
Height 65mm
Width 37mm

Electrical

Power Supply 3V Lithium Battery
CR2032

The **Wise iLike Remote** is available in 2 and 4 channel versions and can be used to control any of the receivers in the Wise Controls range. The function of the switch, and each of its buttons, depends upon the function of the wireless receiver it is programmed to. Therefore a single button can be used for a variety of functions including, but not restricted to, on/off and dimming, or master off only.

The 1, 2 and 4 button remotes can be programmed to any of the channels on the Wise receivers, with the possibility of adding up to 32 switches. This means there is no need for two way wiring as you can just add another radio switch and place it where you like.

You could keep one with your car keys and as you drive up to your house, you can switch on your garden lights and hall lights.

You can program the 1 button remote to switch more than one Wise receiver. So for example, if you had three receivers it is possible with the 1 button switch to control a circuit from each of the receivers. There is no limit on how many Wise receivers are programmed to the same remote.

The battery life lasts up to 3 years.
