

The **Wise Retractive Switch Transmitter Volt Free** is designed to be used with any volt free contacts. This means it can be wired to a variety of mains voltage products, with the signal interfacing with any of our Wise receivers.

The control push buttons work with a 12V power supply and they are isolated from the 240V line by a transformer, keeping the connections of the push-buttons separate from the 240V power supply.

It can be programmed in 2 different ways using any push-to-make switch:

- **Option A : Single Button Switching ON/OFF** - The circuit can be turned ON/OFF from a single button.
- **Option B : Two Button Switching ON/OFF** - The circuit can be turned ON/OFF from two buttons, for independent ON and OFF.

Wise Controls Introduction Video

WISE 2CH TRANSMI

2 Channel 240V
Quicklink: Q20D1

General

Colour	White
Construction	Plastic
IP Rating	IP20

Dimensions

Depth	20mm
Height	50mm
Width	48mm

Electrical

Input Voltage	240V
Output Voltage	0V
