The Reality MR16 LED 7W is an LED lamp that matches a halogen lamp in terms of light source and aesthetics. This is achieved with the use of a single Cree LED chip with a reflector built around it.

The Reality MR16 LED is compatible with 12V halogen transformers*.

These LED lamps require an LED Dimdrive dimming driver to operate, whether for dimming or on/off switching.

The MR16 Reality Lamp is equivalent to a 75W GU10 halogen lamp. It lasts for 25,000 hours and consumes just 7W.

Key Features

- Replicates halogen reflector
- LED positioned further back for anti glare
- Complies with October 2010 Part L regulations
- Equivalent to 75W GU10
- Lifetime of 25,000
- Fits MR16 lampholder
- Compatible with 12V halogen transformers*

***Please note:** If you are using a 12V halogen transformer, we strongly recommend testing compatibility. For best results, we advise using the linked item.
