The **Dimmable Reality AR70 G2 LED 8W Lamp and driver** is an LED lamp that matches a halogen lamp in terms of light source and aesthetics. This is achieved with the use of a single Cree LED chip with a reflector built around it to prevent glare from the light source. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The AR70 G2 Reality Lamp is equivalent to a 75W AR70 halogen lamp and, like a halogen lamp, is dimmable.
