General

Colour	White
Construction	Plastic
IP Rating	IP54

Photocell Range	10 lux to 300 lux
Time Delay	2 hrs to 16 hrs

Dimensions

Depth	37mm
Length	75mm
Width	60mm

Electrical

Input Voltage	240V
Maximum Wattage	1500W
Output Voltage	240V

The **Wired PIR Sensor Kit 240V** is a **Wise Transmitter** with a wired **Twilight PIR Switch** . The Wise Transmitter enables the PIR to send wireless signals to any Wise Receiver. Ideal for when you cannot install any cables between your sensor and your lighting circuit.

The transmitter is small enough to be placed in many locations, for example, in the ceiling, in the wall either through it, behind a recessed light fitting or in a surfaced mounted fitting. The transmitter should be placed in a suitable insulated box.

It can be fitted into a small waterproof box to allowed it to be used outside for your garden lighting, garage doors and water features.

The transmitters are designed to be simple to install, easy to use and most importantly, reliable.
