Construction	Plastic
IP Rating	IP20

Radio Frequency 868.3 MHz

Dimensions

Depth	25mm
Height	80mm
Width	80mm

Electrical

Voltage	240V
---------	------

This is a kit consisting of a **Wise Mouse Dimmer Switch Daylight Sensor & Wise Scene LED Dimming Receiver**.

The **Wise Mouse Dimmer** is a wireless table dimmer with daylight sensor.

Wireless switches can be used to control any of the receivers in the Wise Controls range. The function of the switch, and each of its buttons, depends upon the function of the wireless receiver it is programmed to. Therefore a single button can be used for a variety of functions including, but not restricted to, on/off, dimming or master off only.

The **Wise Scene Leading & Trailing Edge Dimming Receiver** is a 250W 240V dimmer that is controlled by wireless switches or by a push-to-make switch. It can dim incandescent, mains halogen, low voltage halogen and LEDs. The product has a built in control circuitry that adapts to the load connected, changing automatically between leading edge and trailing edge dimming modes. It can be programmed in 5 different ways using our wireless switches.
