The **WiseRetro Radio Module** is a single channel radio module that can be programmed to any of the circuits on the Wise receivers. It has been designed to fit onto any standard dimmer plate from 1 gang to 24 gang. The retro radio module has a locking nut that screws onto the front of the dimmer plate. 32 retro radio modules can be added to each Wise receiver providing ultimate flexibility.

When the button is pressed a red light will glow from the behind the switch button. This is the battery indicator.

The battery life lasts up to 3 years.

A 25mm backbox is required for this switch.
