Radio Frequency	868.3 MHz
Dimensions	
Depth	10mm
Height	80mm
Width	80mm
Electrical	
Power Supply	3V Lithium Battery CR2430

The **42 Channel Wise Skin Switch** allows you to control any receiver within our **Wise Controls** Range. The switches 7 buttons allows you to program an on/off function for 7 circuits, while an eighth button allows you to move to a new level. This new level is indicated by the position of an LED on the front of the switch.

Each new level is the equivalent of having another 7 button switch, allowing you to be able to independently control 42 circuits, instead of the previous maximum of 7.

An adhesive pad is included for mounting the switch.
